

CHEMICAL AND PHYSICAL PROCESSES IN COMBUSTION

**1995 FALL TECHNICAL MEETING
THE EASTERN STATES SECTION OF THE COMBUSTION INSTITUTE
OCTOBER 16-18, 1995
WORCESTER POLYTECHNIC INSTITUTE
WORCESTER, MA**

**EXECUTIVE COMMITTEE OF
THE EASTERN STATES SECTION
OF THE COMBUSTION INSTITUTE**

1993-1995

Chair:	Robert J. Santoro The Pennsylvania State University
Vice-Chair:	Richard G. Gann National Institute of Standards & Technology
Secretary:	Kenneth Brezinsky Princeton University
Treasurer:	Clark E. Hermance University of Vermont
Papers Chair:	K. Kailasanath Naval Research Laboratory
Program Chair:	Mitchell D. Smooke Yale University
Arrangements Chair:	Meredith B. Colket United Technologies Research Center
Members-at-large:	Sanjay M. Correa GE Research Center Frederick C. Gouldin Cornell University Lisa D. Pfefferle Yale University Terry W. Rawlins Physical Sciences Inc. Joseph J. Sangiovanni United Technologies Research Center Kermit C. Smyth National Institute of Standards & Technology Patricia A. Tatem Naval Research Laboratory Phillip R. Westmoreland University of Massachusetts

Monday, October 16, 1995

**Session A-1: Diagnostics I
Chairperson: K. C. Smyth, NIST**

9:30	1.	Determination of Scalar Properties in a Baffle-Stabilized Propane Flame by Rayleigh Scattering, <i>C. Arcoumanis, F.-Q. Zhao and J.H. Whitelaw, Imperial College, London, England</i>	47
9:50	2.	Laser-Induced Fluorescence Measurements of Temperature in Low-Pressure Flames, <i>J. Luque, M. Tamura, J.E. Harrington, G.P. Smith, D.R. Crosley and J.B. Jeffries, SRI International, Menlo Park, CA</i>	51
10:10	3.	Gas Temperature Measurements by Stokes/Anti-Stokes Raman Thermometry in Spray Flames, <i>A.N. Karpets and A. Gomez, Yale University, New Haven, CT</i>	55
10:50	4.	Design of a Time and Space Resolving Sampling Probe for an Internal Combustion Engine's Exhaust Gas, <i>D. Kayes and S. Hochgreb, MIT, Cambridge, MA</i>	59
11:10	5.	Tomographic Reconstruction of Absorption Coefficient Distributions from a Limited Number of Laser Absorption Measurements, <i>E.D. Tornaiainen, K.W. Lam, A.M. Chojnacki, F.C. Gouldin and G.J. Wolga, Cornell University, Ithaca, NY</i>	63
11:30	6.	Planar Imaging Applications in Sooting Turbulent Diffusion Flames, <i>S.B. Gupta, T. Ni and R.J. Santoro, Penn State University, University Park, PA</i>	67
11:50	7.	Quantitative Two-Photon LIF Imaging of CO in Flickering CH₄/Air Diffusion Flames, <i>D.A. Everest, C.R. Shaddix and K.C. Smyth, National Institute of Standards and Technology, Gaithersburg, MD</i>	71

Monday, October 16, 1995

Session B-1: Flames I

Chairperson: G. Patnaik, NRL

- 9:30 8. **On the Structure of Non-Sooting Counterflow Acetylene and Ethylene Diffusion Flames**, *C.J. Sun, H. Wang, C.J. Sung and C.K. Law, Princeton University, Princeton, NJ* 75
- 9:50 9. **Flame Structure of a Premixed Fuel-Rich Methane Flame**, *F. Luo and L.I. Yeh, Exxon Research and Engineering Co., Annandale, NJ* 79
- 10:10 10. **Star-Shaped Premixed Flames and Spatially Periodic Velocity Fields in Axisymmetric Counterflows**, *H. Lee and S.H. Sohrab, Northwestern University, Evanston, IL* 83
- 10:50 11. **The Fragile Structure of Partially Premixed Methane /Air vs. Air Counterflow Flames**, *M.A. Tanoff, M.D. Smooke, Yale University, New Haven, CT, R.J. Osborne, T.M. Brown, and R.W. Pitz, Vanderbilt University, Nashville, TN* 87
- 11:10 12. **Reynolds and Lewis Number Effects in Unsteady Reactive Square Jets**, *F.F. Grinstein and K. Kailasanath, Naval Research Laboratory, Washington, DC* 91
- 11:30 13. **Effect of Fuel Side Radiative Heat Losses on a Diffusion Flame**, *A. Ray and I.S. Wichman, Michigan State University, East Lansing, MI* 95
- 11:50 14. **Numerical Simulations of Local Extinction in Lifted Methane-Air Jet Diffusion Flames**, *C.R. Kaplan, G. Patnaik, K. Kailasanath and E.S. Oran, Naval Research Laboratory, Wash., DC* 99

Monday, October 16, 1995

Session C-1: Chemical Kinetics I

Chairperson: A. Fontijn, RPI

- 9:30 15. **Theoretical Rate Constants for the $\text{NH}_3 + \text{NO}_x \rightleftharpoons \text{NH}_2 + \text{HNO}_x$ ($x = 1,2$) Reactions by Ab Initio MO/VTST Calculations**, *A.M. Mebel, E.W.G. Diau, M.C. Lin and K. Morokuma, Emory University, Atlanta, GA* 103
- 9:50 16. **Time-Dependent Solutions of the Master Equation for Chemically Activated Reactions**, *J.W. Peterson and P.R. Westmoreland, University of Massachusetts, Amherst, MA* 107
- 10:10 17. **O + NNH — A Possible New Route for NO_x Formation in Flames**, *J.W. Bozzelli, New Jersey Institute of Technology, Newark, NJ, and A.M. Dean, Exxon Research and Engineering Co., Annandale, NJ* 111
- 10:50 18. **Ab Initio MO and RRKM Calculations for the Multichannel Rate Constants of the $\text{C}_2\text{H}_3 + \text{O}_2$ Reaction**, *A.M. Mebel, E.W.G. Diau, M.C. Lin and K. Morokuma, Emory University, Atlanta, GA* 115
- 11:10 19. **Analysis of Mono-Chloro Vinyl and Vinyl Radical Reactions with O_2** , *H.M. Chiang, T.H. Lay and J.W. Bozzelli, New Jersey Institute of Technology, Newark, NJ* 119
- 11:30 20. **Hydrogen-Oxygen Chemistry Problems at Temperatures Above About 1500 K**, *R.A. Shandross, J.P. Longwell and J.B. Howard, MIT, Cambridge, MA* 123
- 11:50 21. **Laser-Induced Fluorescence and Mass-Spectrometric HTFFR Studies of the $\text{Cu} + \text{HCl}$ Reaction at Incineration Temperatures**, *D.P. Belyung, J. Hranisavljevic, G.M. Santana and A. Fontijn, Rensselaer Polytechnic Institute, Troy, NY* 127

Monday, October 16, 1995

Session A-2: Ignition and Detonations

Chairperson: S. Hochgreb, MIT

- 2:30 22. Dynamics Near Ignitions and Extinctions of Premixed H₂/Air Mixtures, *S. Kalamatianos and D.G. Vlachos, University of Massachusetts, Amherst, MA* 131
- 2:50 23. Ignition of Hydrogen and Oxygen in Counterflow at Low Temperatures, *B.T. Helenbrook and C.K. Law, Princeton University, Princeton, NJ* 135
- 3:10 24. On Ignition in Counterflowing CO/H₂ and CO/H₂O versus Heated Air, *J.Y.D. Trujillo, T.G. Kreutz and C.K. Law, Princeton University, Princeton, NJ* 139
- 3:50 25. KrF Excimer Laser Ignition of Jet A Vapor/Air Mixtures, *Y.C. Li, D. Zhou and M. Lavid, ENERGIA, Inc., Princeton, NJ* 143
- 4:10 26. Inhibition of Homogeneous Ignition by a Catalytic Surface, *P.A. Bui, D.G. Vlachos and P.R. Westmoreland, University of Massachusetts, Amherst, MA* 147
- 4:30 27. Using CSP to Develop Simplified Kinetic Mechanisms in Diffusive Systems: Ignition of Counterflowing Methane versus Heated Air, *C.G. Fotache, T.G. Kreutz and C.K. Law, Princeton University, Princeton, NJ* 151
- 4:50 28. Some Considerations of Detonation Parameters and Effects of Initial Mixture Molecular Weight, *I. Glassman and C.J. Sung, Princeton University, Princeton, NJ* 155

Monday, October 16, 1995

Session B-2: Models and Methods for Numerical Combustion

Chairperson: M. A. Tanoff, Yale University

- 2:30 29. A Uniform Strain Model of Elemental Flame for Turbulent Combustion Simulation, *C. Petrov and A. Ghoniem, MIT, Cambridge, MA* 159
- 2:50 30. Flame3D: A New Time-Dependent, Three-Dimensional Flame Model with Detailed Chemistry, *G. Patnaik, Berkeley Research Associates, K. Kailasanath and R. Sinkovits, Naval Research Laboratory, Washington, DC* 163
- 3:10 31. Recent Developments of the Lewis PDF Solver, *A.T. Norris, NASA Lewis Research Center, Cleveland, OH* 167
- 3:50 32. Rate-Controlled Constrained-Equilibrium Calculation Using GNASA and GSTANJAN Equilibrium Code, *P.S. Bishnu, D. Hamiroune, H. Metghalchi, Northeastern University, Boston, MA, and J.C. Keck, MIT, Cambridge, MA* 171
- 4:10 33. Rate-Controlled Constrained-Equilibrium Using Constraint Potentials Applied to Hydrogen-Oxygen System, *D. Hamiroune, P. Bishnu, M. Metghalchi, Northeastern University, Boston, MA, and J.C. Keck, MIT, Cambridge, MA* 175
- 4:30 34. Equilibrium Composition Calculations for Combustion of Organophosphorus Compounds, *E.M. Fisher, Cornell University, Ithaca, NY* 179
- 4:50 35. Ordered Species List, Based on Valence Bonds, For Use in Hydrocarbon Combustion Models, *E. Mankarios, M. Metghalchi, Northeastern University, Boston, MA, and J.C. Keck, MIT, Cambridge, MA* 183

Monday, October 16, 1995

Session C-2: Fires, Flame Spread and Soot Radiation

Chairperson: V. Motevalli, WPI

- 2:30 36. **Large Eddy Simulations of Buoyant Plumes**, 187
W.E. Mell, A. Johnson, K.B. McGrattan and H.R. Baum, National Institute of Standards and Technology, Gaithersburg, MD
- 2:50 37. **Prediction of Induced Radial Velocity Due to Vortical Structures in Pool Fires**, 191
T.A. Ahmed and B.M. Cetegen, University of Connecticut, Storrs, CT
- 3:10 38. **Effects of Fire Size on Extinguishment Time and Acid Byproducts During Real Scale Halon Replacement Testing**, 195
A. Maranghides, R.S. Sheinson, B.H. Black and W.D. Smith, Naval Research Laboratory, Washington, DC
- 3:50 39. **Experimental Investigation of Flame Spread Over Wood Fiber/Thermoplastic Composites**, 199
A.B. Oladipo and I.S. Wichman, Michigan State University, East Lansing, MI
- 4:10 40. **Horizontal Flame Spread: Determination of Gas-Phase Convective Heat Flux Using a Constant Speed Horizontal Flame Spread Experiment**, 203
Y. Chen, V. Motevalli, Worcester Polytechnic Institute, Worcester, MA, M.A. Delichatsios, Factory Mutual Research Corporation, Norwood, MA, and P.A. Tatem, Naval Research Laboratories, Washington, DC
- 4:30 41. **A Computational Study of the Radiative Properties of Polydisperse Soot Populations**, 207
T.L. Farias, M.G. Carvalho, Instituto Superior Técnico, Lisbon, Portugal, and Ü.Ö. Köylü, Yale University, New Haven, CT
- 4:50 42. **Spectral Extinction Coefficients of Soot Aggregates from Turbulent Diffusion Flames**, 211
Ü.Ö. Köylü, Yale University, New Haven, CT, and G.M. Faeth, Univ. of Michigan, Ann Arbor, MI

Tuesday, October 17, 1995

Session A-3: Unsteady and Pulsed Combustion

Chairperson: H. Johari, WPI

- 9:30 43. **The Perfectly Stirred Pulsed Reactor**, 217
A.S. Feitelberg, GE Corporate Research and Development, Schenectady, NY
- 9:50 44. **Dependence of a Helmholtz Pulse Combustor Performance and Operating Limits Upon Fuel Composition and Equivalence Ratio**, 221
A. Kushari, L. Rosen, J.I. Jagoda and B.T. Zinn, Georgia Institute of Technology, Atlanta, GA
- 10:10 45. **Combustion Oscillation: Chemical Control Showing Mechanistic Link to Recirculation Zone Purge Time**, 225
R.S. Gemmen, G.A. Richards, M.J. Yip and T.S. Norton, Morgantown Energy Technology Center, Morgantown, WV
- 10:50 46. **Effect of Acoustic Oscillations on Sooty Flames**, 229
T. Kan, L. Rosen and J.I. Jagoda, Georgia Institute of Technology, Atlanta, Georgia
- 11:10 47. **Active Control of Combustion Instabilities through Periodic Secondary Fuel Injection**, 233
C.M. Jones, F. Stone, W.P. Shih and D.A. Santavicca, Penn State University, University Park, PA
- 11:30 48. **On the Extinction of Counterflow Diffusion Flames under Oscillation**, 237
J.S. Kistler, C.J. Sung, T.G. Kreutz, C.K. Law and M. Nishioka, Princeton University, Princeton, NJ
- 11:50 49. **Flame Structure Evolution in an Unstable Lean Premixed Gas Turbine Combustor**, 241
W.P. Shih, J. Lee and D.A. Santavicca, Penn State University, University Park, PA

Tuesday, October 17, 1995

Session B-3: Soot Precursors

Chairperson: J. H. Miller, The George Washington University

- 9:30 50. Soot Suppressing Mechanisms of Ferrocene Additive in Laminar Hydrocarbon/Air Nonpremixed Flames, *C.M. Megaridis, K.A. Jensen, J. Zhang and M.Y. Choi, University of Illinois at Chicago, Chicago, IL* 245
- 9:50 51. Aromatic and Linear Hydrocarbon Concentration Measurements in a Non-Premixed Flame, *C.S. McEnally and L.D. Pfefferle, Yale University, New Haven, CT* 249
- 10:10 52. Production of Polycyclic Aromatic Hydrocarbons from Underventilated Hydrocarbon Diffusion Flames, *M.P. Tolocka and J.H. Miller, The George Washington University, Wash., DC* 253
- 10:50 53. Pyrolytic Formation of Polycyclic Aromatic Hydrocarbons (PAH) and Solids in Supercritical Methylcyclohexane, *J.F. Stewart, K. Brezinsky and I. Glassman, Princeton University, Princeton, NJ* 257
- 11:10 54. Rapid Naphthalene Production from Allene and Toluene, *M.B. Colket, United Technologies Research Center, East Hartford, CT* 261
- 11:30 55. A Kinetic Model Describing Polyarene Growth, *M.C. Masonjones and A.F. Sarofim, MIT, Cambridge, MA* 265
- 11:50 56. The Rate of Carbonization of Soot Precursor Particles, *R.A. Dobbins, G.J. Govatzidakis, W. Lu, A.F. Schwartzman, Brown University, Providence, RI, and R.A. Fletcher, National Institute for Standards and Technology, Gaithersburg, MD* 269

Tuesday, October 17, 1995

Session C-3: Diagnostics II; Flames II

Chairperson: W. T. Ashurst, Sandia National Laboratories

- 9:30 57. Species Measurements in Laminar Diffusion Flames of Different Fuel Mixtures, *D.C. Rapp, S. Seo and R.J. Santoro, Penn State University, University Park, PA* 273
- 9:50 58. Soot Precursor Particles and Polycyclic Aromatic Hydrocarbons: Visualization Through Simultaneous Laser Induced Incandescence and Laser Induced Fluorescence Imaging in Diffusion Flames, *R.L. Vander Wal, NASA-Lewis Research Center/NYMA, Cleveland, OH, K.A. Jensen, Z. Zhou and M.Y. Choi, University of Illinois at Chicago, Chicago, IL* 277
- 10:10 59. Fractal Morphology Analysis of Combustion-Generated Aggregates Using Angular Light Scattering and Electron Microscope Images, *Ü.Ö. Köylü, Y. Xing and D.E. Rosner, Yale University, New Haven, CT* 281
- 10:50 60. On the Burning Rate for Premixed Flames, *F.C. Gouldin, Cornell University, Ithaca, NY* 285
- 11:10 61. On the Response of Spherical Premixed Flames Under Rotation, *J. Qian, C.K. Law, Princeton University, Princeton, NJ, and J.K. Bechtold, New Jersey Institute of Technology, Newark, NJ* 289
- 11:30 62. Analytic Description of the Evolution of Two-Dimensional Flame Surfaces, *C.J. Sun, C.J. Sung and C.K. Law, Princeton University, Princeton, NJ* 293
- 11:50 63. Flame Propagation Along a Vortex: the Baroclinic Push, *W.T. Ashurst, Sandia National Laboratories, Livermore, CA* 297

Tuesday, October 17, 1995

Session A-4: Droplets and Sprays; High Temperature Syntheses

Chairperson: B. M. Cetegen, University of Connecticut

- 2:30 64. **Size Selective Dispersion of Droplets in an Isothermal Confined Mixing Layer**, *M.S. Tageldin and B.M. Cetegen, University of Connecticut, Storrs, CT* 301
- 2:50 65. **Computational and Experimental Study of Counterflow Spray Diffusion Flames**, *Y. D'Angelo, I. Silverman, L.P. Gao, A. Gomez and M.D. Smooke, Yale University, New Haven, CT* 305
- 3:10 66. **Co-flow Laminar Diffusion Flames of Monodisperse Sprays**, *Chen, G. and Gomez, A., Yale University, New Haven, CT* 309
- 3:50 67. **Droplet Vaporization and Combustion in Supercritical Flows**, *G.C. Hsiao and V. Yang, Penn State University, University Park, PA* 313
- 4:10 68. **Dispersion and Evaporation of Liquid Droplets in a Differentially-Heated Confined Mixing Layer**, *M.S. Tageldin and B.M. Cetegen, University of Connecticut, Storrs, CT* 317
- 4:30 69. **Synthesis and Morphological Evolution of Al₂O₃ Particles in Laminar Counterflow Diffusion Flames**, *Y. Xing, Ü.Ö. Köylü and D.E. Rosner, Yale University, New Haven, CT* 321
- 4:50 70. **High Temperature Combustion Synthesis Using Supercritical Nitrogen**, *K. Brezinsky, J.A. Brehm, C.K. Law and I. Glassman, Princeton University, Princeton, NJ* 325

Tuesday, October 17, 1995

Session B-4: Solids and Propellants; Heterogeneous Combustion

Chairperson: H. F. Calcote, AeroChem Research Laboratories

- 2:30 71. **Magnesium Coating Effects in Boron Combustion**, *D.G. Keil, E.D. Dreizin, H.F. Calcote, W. Felder and V.K. Hoffman, AeroChem Research Laboratories, Inc., Princeton, NJ* 329
- 2:50 72. **A New Mechanism of Boron Ignition: Through the Formation of a Saturated B-O Solution**, *E.L. Dreizin and H.F. Calcote, AeroChem Research Laboratories, Inc., Princeton, NJ* 333
- 3:10 73. **Statistical Kinetics for Char Combustion and Carbon Burnout**, *R.H. Hurt, Sandia National Laboratories, Livermore, CA, E.G. Brehob and D.J. Maloney, Morgantown Energy Technology Center, Morgantown, WV* 337
- 3:50 74. **An Eigenvalue Method for Computing the Burning Rates of RDX Propellants**, *K. Prasad, M.D. Smooke, Yale University, New Haven, CT, and R.A. Yetter, Princeton University, Princeton, NJ* 341
- 4:10 75. **Distributed Activation Energy Model of Heterogeneous Coal Ignition**, *J.C. Chen, North Carolina A&T State University, Greensboro, NC* 345
- 4:30 76. **Methane Oxidation Over Heated Non-Catalytic/Catalytic Surface: Elliptic and Parabolic Model Comparison**, *H. Karim, L.D. Pfefferle, M.D. Smooke, Yale University, New Haven, CT, P. Markatou, Automated Analysis Corp., Peoria, IL, and Y. Xu, Chemical Bank, New York, NY* 349
- 4:50 77. **Overcoming Surface Effects in Cyclopentadiene Combustion**, *R.G. Butler, K. Brezinsky and I. Glassman, Princeton University, Princeton, NJ* 353

Tuesday, October 17, 1995

Session C-4: Chemical Kinetics II

Chairperson: K. Brezinsky, Princeton University

- 2:30 78. Chloroform Pyrolysis and Oxidation: Experiment and Elementary Reaction Mechanism, *T.H. Lay, Y.S. Won and J.W. Bozzelli, New Jersey Institute of Technology, Newark, NJ* 357
- 2:50 79. An Experimental Study of Benzene Oxidation at Fuel-lean and Stoichiometric Equivalence Ratio Conditions, *Y. Chai and L.D. Pfefferle, Yale University, New Haven, CT* 361
- 3:10 80. Kinetics Analysis on the Reaction of Neopentyl with Oxygen, *R. Wei and J.W. Bozzelli, New Jersey Institute of Technology, Newark, NJ* 365
- 3:50 81. Detailed Reaction Modeling on Chlorodifluoromethane and 2-Chloro-1,1,1,2-Tetrafluoroethane Pyrolysis, *J.J. DiFelice and E.R. Ritter, Villanova University, Villanova, PA* 369
- 4:10 82. An Investigation of Phenoxy and Cyclopentadienyl Radical Kinetics through the Pyrolysis and Oxidation of Anisole, *M. Pecullan, K. Brezinsky and I. Glassman, Princeton University, Princeton, NJ* 373
- 4:30 83. On the Oxidation Kinetics of Premixed Benzene/Air and Toluene/Air Flames, *S.G. Davis, H. Wang, K. Brezinsky and C.K. Law, Princeton University, Princeton, NJ* 377
- 4:50 84. Thermochemical Kinetic Analysis on the Reaction of Tertiary Butyl Radical with Oxygen and an Elementary Reaction Mechanism for Tertiary Butyl Oxidation Below 1200 K, *C.J. Chen and J.W. Bozzelli, New Jersey Institute of Technology, Newark, NJ* 381

Wednesday, October 18, 1995

Session A-5: Waste Disposal and Pollutants

Chairperson: J. C. Hermanson, WPI

- 9:30 85. Pyrolysis and Oxidation of Cellulose and Styrene: an Experimental Study of Reaction Products, *B. Reitan, W. Ho, L.N. Krasnoperov, M.R. Booty, J.W. Bozzelli, New Jersey Institute of Technology, Newark, NJ, J. Shi and C.A. Pettigrew, Procter and Gamble Inc., Cincinnati, OH* 387
- 9:50 86. The Incineration of CH_2Cl_2 and CCl_4 in an Air-Staged Two Zone Turbulent Reactor, *T.B. Salem, R.B. Barat, New Jersey Institute of Technology, Newark, NJ, and C.A. Bass, United States Military Academy, West Point, NY* 391
- 10:10 87. Effect of Steam Injection on the Simultaneous Air-Staged Incineration of Fuel-Bound Nitrogen and Fuel-Bound Chlorine, *T.B. Salem, F. Mao and R.B. Barat, New Jersey Institute of Technology, Newark, NJ* 395
- 10:50 88. Experimental Characterization of Metals in a Partially Premixed Laminar Hydrocarbon/Air Flame, *A.M. Flynn and R.B. Barat, New Jersey Institute of Technology, Newark, NJ* 399
- 11:10 89. Thermal Decomposition of 1,1,2-Trichlorotrifluoroethane (CFC-113) in Hydrogen Environment, *M. Teytelboym, S.K. Gulati, Y.C. Li and M. Lavid, ENERGIA, Inc., Princeton, NJ* 403
- 11:30 90. Emissions of NO_x and CO from Turbulent Jet Flames in a Crossflow, *R.V. Bandaru and S.R. Turns, Penn State University, University Park, PA* 407
- 11:50 91. Stability and Emissions of Lean, Turbulent, Premixed Flames with a Very Lean Co-flow, *J.C. Hermanson, Worcester Polytechnic Institute, Worcester, MA, J.J. Sangiovanni and M.B. Colket, United Technologies Research Center, East Hartford, CT* 411

Wednesday, October 18, 1995

Session B-5: Soot Formation and Growth

Chairperson: J. Howard, MIT

- 9:30 92. **Modeling of Soot Coagulation and Aggregation at High-Pressure Conditions**, A. Kazakov and M. Frenklach, Penn State University, University Park, PA 415
- 9:50 93. **Analysis of Soot Surface Growth in a Laminar C₂H₄/Air Diffusion Flame**, D.C. Rapp and R.J. Santoro, Penn State University, University Park, PA 419
- 10:10 94. **Effects of Hydrodynamics on Soot Formation in Hydrocarbon-Fueled Laminar Opposed Jet Diffusion Flames**, K.-C. Lin and G.M. Faeth, University of Michigan, Ann Arbor, MI 423
- 10:50 95. **Soot Surface Growth by Acetylene and PAH in a Premixed Ethylene Flame**, T.G. Benish, J.B. Howard and A.L. Lafleur, MIT, Cambridge, MA 427
- 11:10 96. **Soot Threshold Measurements Using a Well-Stirred Reactor**, F. Takahashi, J.W. Blust, J. Zelina, R.C. Striebich, University of Dayton Research Institute, Dayton, OH, and C.W. Frayne, Wright Laboratory, Wright-Patterson Air Force Base, OH 431
- 11:30 97. **Why a Sharp Soot Threshold?**, H.F. Calcote and D.G. Keil, AeroChem Research Laboratories, Inc., Princeton, NJ 435
- 11:50 98. **Injection of Halogenated Compounds into Fullerene-Forming Flames**, H. Richter, K. Hernadi, A. Fonseca, J.-M. Gilles, P.A. Thiry, J.B. Nagy, A.A. Lucas, Facultés Universitaires Notre-Dame de la Paix, Namur, Belgium, J. Vandooren and E. de Hoffmann, Université Catholique de Louvain, Louvain-la-Neuve, Belgium 439

Wednesday, October 18, 1995

Session C-5: Flame Suppression; Novel Combustion Topics

Chairperson: P. R. Westmoreland, University of Massachusetts

- 9:30 99. **Effect of CF₃H and CF₃Br on Laminar Diffusion Flames in Normal and Microgravity**, B.A. VanDerWege, M.T. Bush, S. Hochgreb, MIT, Cambridge, MA, and G.T. Linteris, National Institute of Standards and Technology, Gaithersburg, MD 443
- 9:50 100. **C₁ Fluoro- and Hydrofluorocarbon Effects on the Extinction Characteristics of Methane vs. Air Counterflow Diffusion Flames**, M.A. Tanoff, R.R. Dobbins, M.D. Smooke, Yale University, New Haven, CT, D.R.F. Burgess Jr., M.R. Zachariah, W. Tsang, National Institute of Standards and Technology, Gaithersburg, MD, and Westmoreland, P.R., University of Massachusetts, Amherst, MA 447
- 10:10 101. **Study of the Suppression Mechanisms of Small Flames by Water Mist**, C. Ndubizu, V. Motevalli and P. Tatem, Naval Research Laboratory, Washington, DC 451
- 10:50 102. **Fire Suppression by Water Mist — A Numerical Study**, H.D. Ladouceur, J.W. Fleming, Naval Research Laboratory, Washington, DC, and E.F. Brown, Virginia Tech., Blacksburg, VA 455
- 11:10 103. **Extinction of Diluted Methane-Air Counterflow Diffusion Flames**, P. Papas, J.W. Fleming and R.S. Sheinson, Naval Research Laboratory, Washington, DC 459
- 11:30 104. **Nitrous Oxide Anesthesia Creates Flammable In-testinal Gases**, G. Sidebotham, F. Cantelmi, D. Stoffa, Cooper Union, New York, NY, G. Wolf and E. Fried, SUNY Health Science Center at Brooklyn, Brooklyn, NY 463
