

CHEMICAL AND PHYSICAL PROCESSES IN COMBUSTION

**1997 FALL TECHNICAL MEETING
THE EASTERN STATES SECTION OF THE COMBUSTION INSTITUTE
OCTOBER 27-29, 1997
HARTFORD, CONNECTICUT**

**EXECUTIVE COMMITTEE OF
THE EASTERN STATES SECTION
OF THE COMBUSTION INSTITUTE
1995-1997**

Chair:	Richard G. Gann National Institute of Standards and Technology
Vice-Chair:	Frederick C. Gouldin Cornell University
Secretary:	W. Terry Rawlins University of Illinois Chicago
Treasurer:	Clarke E. Hermance University of Vermont
Papers Chair:	Mitchell D. Smooke Yale University
Program Chair:	Phillip R. Westmoreland University of Massachusetts Amherst
Arrangements Chair:	Meredith B. Colket III United Technologies Research Center
Members-at-large:	Anthony M. Dean Exxon Research & Engineering Michael A. Delichatsios Factory Mutual Research Corporation K. Kailasanath Naval Research Technology J. Houston Miller The George Washington University Lisa D. Pfefferle Yale University William Pitts National Institute of Standards and Technology Robert J. Santoro The Pennsylvania State University Patricia A. Tatem Naval Research Laboratory

Monday, October 27, 1997

Session A-1: Soot

Chair: J.B. Howard, Massachusetts Institute of Technology

9:00	1.	"Soot Primary Particle Size Determination via LII?," <i>R.L. Vander Wal, NASA-Lewis Research Center, T.M. Ticich and A.B. Stephens, Centenary College of Louisiana</i>	39
9:20	2.	"Comparative Measurements of Soot Particles by Laser Induced Incandescence in Premixed and Diffusion Flames," <i>K.R. McManus, W.T. Rawlins, and M.G. Allen, Physical Sciences Inc.</i>	43
9:40	3.	"Imaging Studies of Soot Formation in Turbulent Ethylene Jet Flames," <i>S.-Y. Lee and R.J. Santoro, The Pennsylvania State University</i>	47
10:20	4.	"Particle Sampling From a Deuterated Ethene (C_2D_4) Flame," <i>R.A. Fletcher, NIST, R.A. Dobbins, Brown University, and H.-C. Chang, Saint-Gobain/Norton Industrial Ceramics Corp.</i>	51
10:40	5.	"Analysis of Soot Particle Inception in a C_2H_4 /Air, Coannular, Laminar Diffusion Flame," <i>D.C. Rapp, U.S. Military Academy, and R.J. Santoro, The Pennsylvania State University</i>	55
11:00	6.	"Interpretations of a Computational Study of Soot Formation in a Coflow, Laminar Diffusion Flame," <i>M.D. Smooke, Yale University, R.J. Hall and M.B. Colket, United Technologies Research Center</i>	59
11:20	7.	"Electrocatalytic Control of Exhaust Soot," <i>V.L. Callahan, R.B. Barat, NJIT, and J.G. Stevens, Montclair State University</i>	63

Monday, October 27, 1997

Session B-1: Fire Suppression and Inhibitors

Chair: W.M. Pitts, National Institute of Standards and Technology

9:00	35.	"The Contributions of Various Mechanisms in Water Mist Suppression of a Small Diffusion Flame," <i>C.C. Ndubizu, R. Ananth, P.A. Tatem, Naval Research Laboratory, and V. Motevalli, The George Washington University</i>	67
9:20	36.	"Numerical Modeling of Water Mist Suppression of Methane-Air Diffusion Flame," <i>K. Prasad, C. Li, K. Kailasanath, C. Ndubizu, R. Ananth, and P.A. Tatem, Naval Research Laboratory</i>	71
9:40	37.	"Physical, Thermal and Chemical Effects of Fine-Water Droplets in Extinguishing Counterflow Diffusion Flames," <i>A.M. Lentati and H.K. Chelliah, University of Virginia</i>	75
10:20	38.	"Relative Flame Inhibition Effectiveness of Metallic Compounds," <i>V. Babushok and W. Tsang, NIST</i>	79
10:40	39.	"Behavior of Bicarbonate Powders in Counterflow Diffusion Flames," <i>M.D. Reed, B.A. Williams, R.S. Sheinson, and J.W. Fleming, Naval Research Laboratory</i>	83
11:00	40.	"A Novel Method for Evaluating the Effectiveness of Low Volatility Flame Inhibitors with an Opposed-Jet Burner," <i>T.M. Jayaweera, M.A. MacDonald, E.M. Fisher, and F.C. Gouldin, Cornell University</i>	87
11:20	41.	"Inhibited Counterflow Non-Premixed Flames with Variable Stoichiometric Mixture Fractions," <i>M.A. MacDonald, T.M. Jayaweera, E.M. Fisher, and F.C. Gouldin, Cornell University</i>	91

Monday, October 27, 1997

Session C-1: Turbulent Combustion

Chair: W.D. Proscia, United Technologies Research Center

9:00	69.	"Correlation of Flame Speed with Stretch in Turbulent Premixed Methane/Air Flames," <i>J.H. Chen and H.G. Im, Sandia National Laboratories</i>	95
9:20	70.	"Experimental Determination of the Burning Rate in Turbulent Premixed V-Flames using Simultaneous Velocity and Temperature Measurements," <i>C. Ghenai, F.C. Gouldin, Cornell University, and I. Gokalp, Laboratoire de Combustion et Systemes Reactifs, CNRS (France)</i>	99
9:40	71.	"Simultaneous CH Planar Laser-Induced Fluorescence and Particle Imaging Velocimetry in Permanently Blue Nonpremixed Turbulent Jet Flames," <i>J.M. Donbar, J.F. Driscoll, University of Michigan, and C.D. Carter, Innovative Scientific Solutions, Inc.</i>	103
10:20	72.	"Temperature and Unmixed Fuel Measurements in Turbulent Jet Flames by Using Coherent Anti-Stokes Raman Spectroscopy," <i>S.-Y. Lee, S. Pal, and R.J. Santoro, The Pennsylvania State University</i>	107
10:40	73.	"Cold Flow Simulations of a Bluff-Body Flame Stabilizer: Large Eddy Simulation and RANS Models," <i>R.O.S. Prasad, J.P. Gore, Purdue University, and S.-E. Kim, Fluent, Inc.</i>	111
11:00	74.	"Bluff-Body Stabilization Effects in Supersonic Turbulent Combustion," <i>C.J. Roy and J.R. Edwards, North Carolina State University</i>	115
11:20	75.	"Summary of GH ₂ /GO ₂ Raman Spectroscopy Experiments for a Shear Coaxial Injector," <i>M. Lehman, S. Pal, and R.J. Santoro, The Pennsylvania State University</i>	119

Monday, October 27, 1997

Session A-2: Hydrocarbon Chemistries

Chair: H. Wang, University of Delaware

- | | | | |
|------|-----|--|-----|
| 2:30 | 8. | "Comparison of Measured and Computed Concentration of Ground and Excited-State CH in an Axisymmetric Laminar Diffusion Flame," <i>K.T. Walsh, M.B. Long, M.A. Tanoff, and M.D. Smooke, Yale University</i> | 123 |
| 2:50 | 9. | "Concentrations of C_3 to C_{14} Hydrocarbons in Co-Flowing Flames of Methane, Ethane, Ethylene, Propane, and N-Butane," <i>C.S. McEnally and L.D. Pfefferle, Yale University</i> | 127 |
| 3:10 | 10. | "Fullerenes and PAH in Low Pressure Premixed Benzene/Oxygen Flames," <i>W.J. Grieco, A.L. Lafleur, H. Richter, K. Taghizadeh, J.B. Howard, MIT, and K.C. Swallow, Merrimack College</i> | 131 |
| 3:50 | 11. | "Modeling of PAH and Fullerene Formation in Premixed Benzene Flames," <i>H. Richter, W.J. Grieco, and J.B. Howard, MIT</i> | 135 |
| 4:10 | 12. | "Atmospheric Pyrolysis and Oxidation Studies of Decalin," <i>S. Zepieri, K. Brezinsky, and I. Glassman, Princeton University</i> | 139 |
| 4:30 | 13. | "Pressure and Temperature Effects on Supercritical Decalin Pyrolysis," <i>J. Stewart, K. Brezinsky, and I. Glassman, Princeton University</i> | 143 |

Monday, October 27, 1997

Session B-2: Solids Combustion: Chemistry and Morphology

Chair: R.H. Hurt, Brown University

- | | | | |
|------|-----|--|-----|
| 2:30 | 42. | "Modeling Biomass Pyrolysis in Combustion," <i>Y. Chen, S. Charpenay, M.A. Serio, M.A. Wójtowicz, Advanced Fuel Research, Inc., and A. Jensen, Technical University of Denmark</i> | 147 |
| 2:50 | 43. | "The Prediction of Carbon Conversion Efficiency in Pulverized Coal Combustion," <i>J.-K. Sun and R.H. Hurt, Brown University</i> | 151 |
| 3:10 | 44. | "Numerical Modelling of Quasi-Steady Combustion of Porous Graphite Particles," <i>A.R. Kasimov and H.K. Chelliah, University of Virginia</i> | 155 |
| 3:50 | 45. | "The Role of Porosity and Surface Area in Carbon Combustion and Gasification," <i>I. Aarna and E.M. Suuberg, Brown University</i> | 159 |
| 4:10 | 46. | "Lamellar Carbon Structure Evolution in Combustion by Quantitative Digital Analysis of HRTEM Fringe Images," <i>H.-S. Shim, R.H. Hurt, Brown University, and N.Y.C. Yang, Sandia National Laboratories</i> | 163 |
| 4:30 | 47. | "Chemical Aspects of Auto-Oscillations in Solid State Combustion," <i>O.E. Kashireninov and I.A. Yuranov, Institute of Structural Macrokinetics (Russia)</i> | 167 |

Monday, October 27, 1997

Session C-2: Flame Structure and Strain

Chair: A.J. Marchese, Rowan University

- | | | | |
|------|-----|---|-----|
| 2:30 | 76. | "Observations of Tribrachial Flames Produced in a Counterflow,"
<i>P. Papas and A. Tomboulides, Swiss Federal Institute of Technology (Switzerland)</i> | 171 |
| 2:50 | 77. | "Triple Flames in Counterflow," <i>M.A. Tanoff, M.D. Smooke, Yale University, D.A. Greenhalgh and R.D. Lockett, Cranfield University (United Kingdom)</i> | 175 |
| 3:10 | 78. | "Measured Local Propagation Velocities of Wrinkled Premixed Flames," <i>J.O. Sinibaldi, C.J. Mueller, J.F. Driscoll, University of Michigan</i> | 179 |
| 3:50 | 79. | "Generalized State Relationships of Laminar Permanently-Blue, Opposed-Jet Hydrocarbon-Fueled Diffusion Flames," <i>K.-C. Lin and G.M. Faeth, The University of Michigan</i> | 183 |
| 4:10 | 80. | "Laser-Induced Fluorescence Measurements of Temperature in a Counterflow Diffusion Flame," <i>D.A. Santoianni, W.L. Roberts, North Carolina State University, and C.A. Cataldo, IBM Corp.</i> | 187 |
| 4:30 | 81. | "Determination of the Strain in Counterflow Diffusion Flames from Flow Conditions," <i>E.M. Fisher, B.A. Williams, and J.W. Fleming, Naval Research Laboratory</i> | 191 |
| 4:50 | 82. | "Structure and Evolution of the Stabilization Point of a Lifted Reacting Jet," <i>B. Milne, K. Devine, S. Kempka, and H.N. Najm, Sandia National Laboratories</i> | 195 |

Tuesday, October 28, 1997

Session A-3: Kinetics and Thermochemistry

Chair: J.W. Fleming, Naval Research Laboratory

- | | | | |
|-------|-----|---|-----|
| 9:00 | 14. | " $C_2H_4 + H$ and $C_2H_4 + OH$ Chemistry Measured in Laminar, Premixed Flat Flames," <i>A. Bhargava and P.R. Westmoreland, University of Massachusetts Amherst</i> | 201 |
| 9:20 | 15. | "Kinetic Stability of 1,1,1 Trifluoroethane," <i>W. Tsang, NIST, and Assa Lifshitz, The Hebrew University (Jerusalem)</i> | 205 |
| 9:40 | 16. | "Experimental Study on 2H-Heptafluoropropane Pyrolysis," <i>E. Ritter, Villanova University</i> | 209 |
| 10:20 | 17. | "Chemical Activation Reactions at High Temperatures," <i>V. Mokrushin, W. Tsang, and M.R. Zachariah, NIST</i> | 213 |
| 10:40 | 18. | "SECI, a Semi-Empirical Method for Calculating the Temperature Dependence of Metal Species Combustion Reactions," <i>A.S. Blue and A. Fontijn, Rensselaer Polytechnic Institute</i> | 217 |
| 11:00 | 19. | "A Computational Study on the Thermochemistry of Cyclopentadiene Derivatives," <i>H. Wang, University of Delaware</i> | 221 |
| 11:20 | 20. | "Estimation of the Thermodynamic Properties of CHO Species," <i>H. He, H. Metghalchi, Northeastern University, and J.C. Keck, MIT</i> | 225 |

Tuesday, October 28, 1997

Session B-3: Ignition and Extinction

Chair: S. Hochgreb, Massachusetts Institute of Technology

- | | | | |
|-------|-----|---|-----|
| 9:00 | 48. | "Methane/Air Instabilities Driven by Chain-Branching and Thermal Feedback: The Premixed Nature of Ignition," <i>Y.K. Park and D.G. Vlachos, University of Massachusetts Amherst</i> | 229 |
| 9:20 | 49. | "A Multiparameter Investigation of Oscillatory Ignition in the Air Oxidation of Hydrogen in a Continuous-Flow Stirred Tank Reactor," <i>R.J. Olsen, Vassar College, and D.G. Vlachos, University of Massachusetts Amherst</i> | 233 |
| 9:40 | 50. | "Intermittent Ignition of Low Concentration Hydrogen in Turbulent Nonpremixed Counterflow," <i>J.D. Blouch, C.J. Sung, C.G. Fotache, and C.K. Law, Princeton University</i> | 237 |
| 10:20 | 51. | "Ignition of CO/H_2 versus Heated Air in Counterflow: An Experimental and Numerical Modeling Study," <i>C.G. Fotache, Y. Tan, and C.K. Law, Princeton University</i> | 241 |
| 10:40 | 52. | "Piloted Ignition of a Slick of Oil on Water," <i>N. Wu and J.L. Torero, University of Maryland</i> | 245 |
| 11:00 | 53. | "Ignition Times for Thermally Thick and Intermediate Conditions in Flat and Cylindrical Geometries," <i>M. Delichatsios, Renewable Resources Associates</i> | 249 |
| 11:20 | 54. | "Extinction of Inwardly-Propagating Spherical Flames," <i>C.J. Sun and C.K. Law, Princeton University</i> | 253 |

Tuesday, October 28, 1997

Session C-3: Droplets and Particles

Chair: J.J. Helble, University of Connecticut

- | | | | |
|-------|-----|--|-----|
| 9:00 | 83. | "A Study of a Turbulent Spray Flame. Part I: Experimental Results," <i>A.N. Karpetis and A. Gomez, Yale University</i> | 257 |
| 9:20 | 84. | "A Study of a Turbulent Spray Flame. Part II: Momentum Scaling and Implications," <i>A.N. Karpetis and A. Gomez, Yale University</i> | 261 |
| 9:40 | 85. | "Measurements of Droplet Size in the Near Field of a Droplet Laden Jet using MDR Spectroscopy," <i>P.J. Santangelo, D. Flowers, and I.M. Kennedy, UC Davis</i> | 265 |
| 10:20 | 86. | "The Behavior of Chromium in a Laminar Diffusion Flame," <i>S. Yu, Y. Yoon, Y. Zhang, and I.M. Kennedy, UC Davis</i> | 269 |
| 10:40 | 87. | "Fractal Analysis of Combustion Generated Inorganic Ash Aerosols," <i>B.B. Liu and J.J. Helble, University of Connecticut</i> | 273 |
| 11:00 | 88. | "On Particle Dispersion in Shear Flows of Variable Density and Viscosity," <i>M.C. Soteriou and X. Yang, University of Connecticut</i> | 277 |

Tuesday, October 28, 1997

Session A-4: Combustion Modeling

Chair: D.G. Vlachos, University of Massachusetts

2:30	21.	"Local Rectangular Refinement with Application to Axisymmetric Laminar Diffusion Flames," <i>B.A.V. Bennett and M.D. Smooke, Yale University</i>	281
2:50	22.	"Effect of Equivalence Ratio on Premixed Flame Response to Unsteady Strain-Rate and Curvature," <i>H.N. Najm, P.S. Wyckoff, Sandia National Laboratories, and O.M. Knio, Johns Hopkins University</i>	285
3:10	23.	"Piloted CH_4 Flames — Comparison of PDF Calculations with Experiments," <i>V. Saxena and S.B. Pope, Cornell University</i>	289
3:50	24.	"Chemical Kinetic Modeling of Post Flame Oxidation of Unburned Hydrocarbons," <i>K. Wu and S. Hochgreb, MIT</i>	293
4:10	25.	"Laminar Flame Speeds and Oxidation Kinetics of Tetrachloromethane," <i>J.C. Leylegian, H. Wang, and C.K. Law, Princeton University</i>	297
4:30	26.	"Effects of Third-Body Collision Efficiencies on Burning Velocities of Hydrogen/Air Flames," <i>K.T. Aung, Georgia Institute of Technology</i>	301
4:50	27.	"Two-Dimensional Detailed Chemistry Simulations in Catalytic Monoliths for Methane Combustion," <i>D.G. Vlachos, University of Massachusetts Amherst</i>	305

Tuesday, October 28, 1997

Session B-4: Combustion Applications

Chair: W.L. Roberts, North Carolina State University

2:30	55.	"Description of a Combustion Flame for the Production of Silicon Carbide," <i>H.F. Calcote and D.G. Keil, AeroChem Research Laboratory</i>	309
2:50	56.	"An Optical and Parametric Study of Unstable Combustion," <i>K.K. Venkataraman, D.W. Simons, L.H. Preston, J.G. Lee, D.A. Santavicca, The Pennsylvania State University, and B.J. Lee, Korea Research Institute of Standards and Science</i>	313
3:10	57.	"Recent Experimental Results in High-Pressure Gas Turbine Combustion Instabilities," <i>J.C. Broda, S. Seo, S. Pal, and R.J. Santoro, The Pennsylvania State University</i>	317
3:50	58.	"The Combustion Efficiency of Supersonic Hydrogen-Air Flames," <i>A. Ratner and J.F. Driscoll, University of Michigan</i>	321
4:10	59.	"Experimental Investigation of LOX/ GH_2 Rocket Combustion," <i>S. Yeralan, S. Pal, and R.J. Santoro, The Pennsylvania State University</i>	325
4:30	60.	"Modeling of Ammonium Perchlorate Diffusion Flames," <i>N. Ilincic, M.D. Smooke, Yale University, R.A. Yetter, Princeton University, T. Parr and D. Hanson-Parr, Naval Air Warfare Center</i>	329
4:50	61.	"A Plasma Torch Reactor for Shipboard Destruction of Navy Solid Waste," <i>S.H. Peterson, D.A. Counts, R.V. Richard, Geo-Centers, Inc., B.D. Sartwell, Naval Research Laboratory, and Q. Han, University of Minnesota</i>	333

Tuesday, October 28, 1997

Session C-4: Unsteady-State Phenomena

Chair: E.M. Fisher, Cornell University

- | | | | |
|------|-----|---|-----|
| 2:30 | 89. | "Self-Sustained Oscillations in Distributed Flames Modeled with Detailed Chemistry," <i>P.-A. Bui, D.G. Vlachos, and P.R. Westmoreland, University of Massachusetts Amherst</i> | 337 |
| 2:50 | 90. | "Pulsating Instability and Flammability Limits of One-Dimensional Planar Flames with One-Step Chemistry and Constant Properties," <i>E.W. Christiansen, C.J. Sung, C.J. Sun, and C.K. Law, Princeton University</i> | 341 |
| 3:10 | 91. | "A Premixed Flame in Oscillating Stagnation Point Flow: Hydrodynamic Effects," <i>Z. Huang, J.K. Bechtold, New Jersey Institute of Technology, and M. Matalon, Northwestern University</i> | 345 |
| 3:50 | 92. | "Length of Fully-Modulated Diffusion Flames," <i>J.C. Hermanson, R. Dugnani, and H. Johari, Worcester Polytechnic Institute</i> | 349 |
| 4:10 | 93. | "Unsteady Velocity Measurements in a Counterflow Diffusion Flame using Laser Doppler Velocimetry," <i>M.E. DeCroix, W.L. Roberts, and R.D. Gould, North Carolina State University</i> | 353 |
| 4:30 | 94. | "Suppression of Corner Vortex in a Rapid Compression Machine," <i>D. Lee and S. Hochgreb, MIT</i> | 357 |

Wednesday, October 29, 1997

Session A-5: Diagnostics Development and Applications

Chair: L.D. Pfefferle, Yale University

- | | | | |
|-------|-----|--|-----|
| 9:00 | 28. | "Calibration of Laser Induced Incandescence in a Counterflow Diffusion Flame," <i>M.E. DeCroix and W.L. Roberts, North Carolina State University</i> | 363 |
| 9:20 | 29. | "High Temperature Infrared Emission Spectra and Absolute Intensities of $H_2O(\nu_2)$," <i>W.T. Rawlins, M.F. Miller, M.G. Allen, Physical Sciences Inc., and T.E. Parker, The Colorado School of Mines</i> | 367 |
| 9:40 | 30. | "An Intelligent Fire Detection System Using Advanced Infrared Diagnostics and Neural Network Techniques," <i>Y. Chen, S. Sathyamoorthy, and M.A. Serio, Advanced Fuel Research, Inc.</i> | 371 |
| 10:20 | 31. | "Crossed-plane Laser Tomography: Direct Measurement of Flamelet Normal and Surface Density," <i>D.C. Bingham, F.C. Gouldin, and D.A. Knaus, Cornell University</i> | 375 |
| 10:40 | 32. | "Three-Scalar Techniques for Mixture Fraction Imaging in Turbulent Nonpremixed Methane Flames," <i>A.M. Schaffer, J. Fielding, and M.B. Long, Yale University</i> | 379 |
| 11:00 | 33. | "Mixture Fraction Measurements in Time-varying Diffusion Flames Using Tunable Diode Laser Absorption Spectroscopy," <i>R.R. Skaggs and J.H. Miller, The George Washington University</i> | 383 |
| 11:20 | 34. | "Tunable Diode Laser Absorption Spectroscopic (TDLAS) Measurements of Formaldehyde in a Laminar Methane/Air Diffusion Flame," <i>M.P. Tolocka and J.H. Miller, The George Washington University</i> | 387 |

Wednesday, October 29, 1997

Session B-5: Pollutants

Chair: M.A. Tanoff, Yale University

- 9:00 62. "Experimental Investigation of NO Formation in Rich Premixed Bunsen Flames," A.V. Mokhov and H.B. Levinsky, N.V. Nederlandse Gasunie (The Netherlands) 391
- 9:20 63. " NO_x Formation and Destruction Near Inert and Catalytic Surfaces," D.G. Vlachos, P. Aghalayam, and M.H. Zullo, University of Massachusetts Amherst 395
- 9:40 64. "Thermal Reduction of NO_2 by H_2 : FTIR Spectrometric Measurement with Comprehensive Kinetic Modeling," J. Park, N.D. Giles, and M.C. Lin, Emory University 399
- 10:20 65. "Numerical Study of the Influence of Temporal Fuel/Air Unmixedness on NO_x Emissions in Lean Premixed Catalytically Stabilized Combustion," A.L. Boehman, The Pennsylvania State University, A. Schlegel and R.W. Dibble, University of California Berkeley 403
- 10:40 66. "On the Combustion/Emissions of Tire-Derived Fuel and Pulverized Coal," A. Atal and Y.A. Levendis, Northeastern University 407
- 11:00 67. "A Comparison of Carbon Monoxide Emissions from Butane, Propane, and Dimethyl Ether Flames," C.A. Frye, A.L. Boehman, The Pennsylvania State University, and P.J.A. Tijm, Air Products and Chemicals, Inc. 411
- 11:20 68. "Characterization of Sodium in a Partially Premixed Laminar Methane/Air Flame," A.M. Flynn, D. Apostolou, and R.B. Barat, NJIT 415

Wednesday, October 29, 1997

Session C-5: Buoyancy Phenomena

Chair: H.D. Ross, National Aeronautics and Space Administration

- 9:00 95. "Detailed Kinetic Modeling of Microgravity N-Alkane Droplet Flames," A.J. Marchese, Rowan University, and F.L. Dryer, Princeton University 419
- 9:20 96. "Numerical Simulations of Premixed Methane-Air Flame-Vortex Interactions in Microgravity," G. Patnaik and K. Kailasanath, Naval Research Laboratory 423
- 9:40 97. "Flame-Ball Drift," J. Buckmaster, University of Illinois, and P. Ronney, University of Southern California 427
- 10:20 98. "Experiments on the Instability of Planar Buoyant Plumes of Helium and Helium/Air Mixtures," Y. Dong and B.M. Cetegen, University of Connecticut 431
- 10:40 99. "Simulation of the Unsteady Behavior of Planar Buoyant Plumes," M.C. Soteriou, Y. Dong, and B.M. Cetegen, University of Connecticut 435
